*Bible verses don't repair a house roof, sermons don't prevent war and worship songs don't bring about the energy transition: Let's be honest - does faith help us at all to create a better world?*

*On Sunday I know: What the world needs is Jesus!*

*On Monday I say: We need education for everyone, direct democracy and vegan canteen food.*

*So how is my faith related to my daily activities and to the concerns of our society?*
